Distance to the original pose | no ligand alignment; symmetry-aware
small twist: same eligible inputs at all steps
large twist: same eligible inputs at all steps
Free-region RMSD (angstrom; lower is closer)
Integration steps
base: 30,645 common inputs
v2: 29,943 common inputs
input baseline (all eligible)
UFF baseline (all eligible)
base: 30,348 common inputs
v2: 29,813 common inputs
